

Night works

January 28 – February 4
Armagh-Colombo Street
intersection

What	Night works for part one of our intersection work
When	From Sunday 28 January 2018 from 8pm to 6am for one week
Why	We are working at night to minimise the impact on businesses and the travelling public

WHAT WE ARE DOING

Our work involves:

- Installing new drainage pipes from corner to corner at the intersection
- Installing new ducting to upgrade the traffic signals

HOW THIS WILL IMPACT YOU

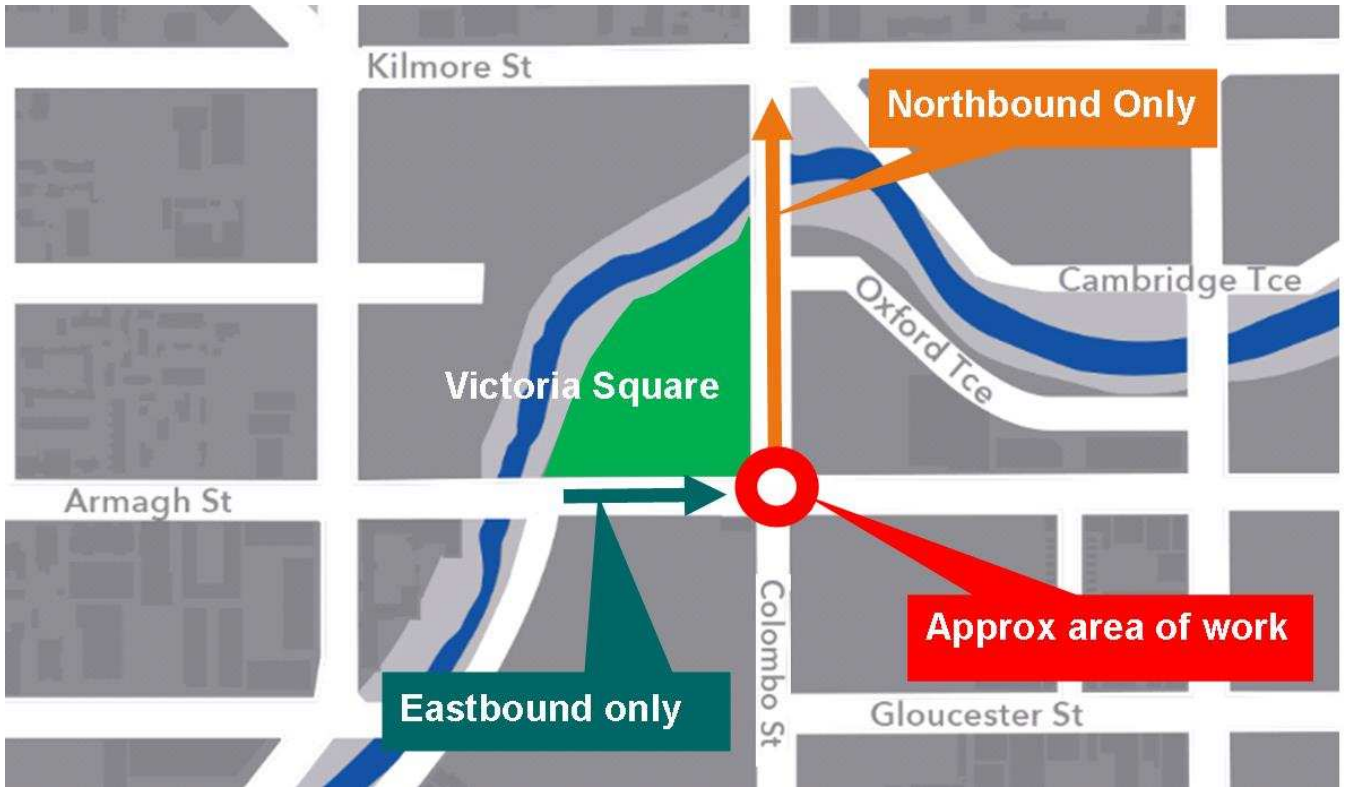

- Traffic will still be able to go through the intersection, but detour routes may be in place.
- Our area of work will change and move as work progresses.
- If you travel this area regularly at night, please be aware that there will be constant changes to the traffic layout.
- There will be some construction noise associated with our work.

ROADWORK REMINDERS

- Colombo Street will continue to be one-way northbound until mid-April
- Armagh Street will remain one-way eastbound until Victoria Square is re-opened in March.

Please turn over
