

Notice of work:

Metro Sports Facility Christchurch Central

| | |
|--------------|--|
| What | Temporary Closure of footpath and car parks |
| Where | West Side of Antigua Street, between Moorhouse Ave and St Asaph Street |
| When | 13 February 2019 to 31 March 2019 |
| Why | To allow safe access to complete the ground improvement works |

The Metro Sports Facility will be Christchurch's premier community sport and recreation facility, catering for people of all ages and abilities including high performance athletes.

The March Menard Joint Venture (MMJV) are installing approximately 8000 vibro stone columns, to provide improved ground bearing and liquefaction resistance beneath the foundations of the new MSF structure.

WHAT ARE WE DOING

Safety is our number one priority. Because of the proximity to the site boundary of the ground improvement works, and to ensure the safety of the road users, cyclists and pedestrians, from the risks presented by heavy plant operations, it has become necessary to temporarily close the footpath and carparks adjacent to the works during stone column installation on the Antigua St boundary.

WHERE ARE WE WORKING

HOW THIS MAY IMPACT YOU

Footpath

The footpath on the western side of Antigua St will be closed from Moorhouse Avenue north to St Asaph St. No pedestrian access will be possible during the closure. Pedestrian crossing points are in place at Moorhouse Ave and St Asaph St.

Car Parks

The car parks on the western side of Antigua St will be closed from the approximate position of the old Balfour Terrace, north to St Asaph St. Car parks will be closed and coned off for the duration of the closure.

Cycle Lane

We do not expect any impact on the cycle lane during this closure.

Working Hours

The closure will apply full time, 24 hours per day for 7 days per week.

Traffic Impacts

Two-way traffic will be maintained on Antigua St, Moorhouse Ave and St Asaph St.

Additional truck traffic can be expected on Antigua St, as the works will require some 30-40 truck movements throughout the 10 hour day.

MMJV recognise Antigua St as a popular access route to and from the CBD, for cycle and foot traffic. All care shall be taken when trucks are required to enter or leave the site.

The vibro-flut penetrates the ground, and crushed local stone is fed in to the void, forming a dense column of compacted gravel.

GENERAL INFORMATION

WEATHER

All works are subject to favourable weather and on-site construction conditions.

HOURS

Our Standard work hours are Monday to Saturday between the hours of 7:30am and 6pm.

NOISE

There will be increased noise, dust and vibration levels associated with this work. We will do our best to minimise this.

SAFETY

Safety is our number one priority. Safety is your responsibility too. Stay clear and keep alert – keep children and pets at a safe distance from the work site.
